# CONTENTS OF VOLUME 17

## VOLUME 17 PART 1 JANUARY 1980

Technical Bulletin No. 40

A practical guide to gamma-counting in radioimmunoassay <i>C E Wilde and D Ottewill</i>	1
Calcium metabolism in a fatal case of sodium fluoride poisoning <i>E Simpson, L G Shankra Rao, R M Evans, W Wilkie, J Christine Rodger, and A Lakhani</i>	10
Quantitative recovery of alkaline phosphatase and $\gamma$ -glutamyl transferase isoenzymes after polyacrylamide gel electrophoresis <i>T J Brooks and H G Sammons</i>	15
Clinical usefulness of the simultaneous localisation of the isoenzymes of alkaline phosphatase and $\gamma$ -glutamyl transferase <i>M Baines</i>	20
A new method for the determination of plasma phenylalanine <i>Paul Trinder</i>	26
A simple procedure for the radioimmunoassay of $17\alpha$ -hydroxyprogesterone in serum: comparison with an immunological purification technique <i>Norma Davila, B T Rudd, R Morris, F Kandeel, Jane Bodden, and D R London</i>	31
A rapid solid-phase radioimmunoassay for human plasma follicle-stimulating hormone <i>A C Lovesey</i>	38
An improved colorimetric method for the determination of plasma paracetamol <i>Choo T Archer and R A Richardson</i>	45
Introduction of computer facilities to a clinical chemistry laboratory <i>L M Morgan, G McConnell, E Chandler, and S G Welshman</i>	47
A simple, direct, solid-phase enzymeimmunoassay for cortisol in plasma <i>R K Hindawi, S J Gaskell, G F Read, and Diana Riad-Fahmy</i>	53
Book review	60

## VOLUME 17 PART 2 MARCH 1980

Quality control in clinical chemistry laboratories Guest editor: <i>J F Stevens</i>	61
Quality control of enzyme determinations <i>Sidney B Rosalki</i>	74
Outlying values in the National Quality Control Scheme <i>M J R Healy and T P Whitehead</i>	78
Experiences with a regional quality control scheme for salicylate and paracetamol over a period of two years <i>K Wiener</i>	82
Accuracy and linearity of spectrophotometers in clinical chemistry laboratories <i>J F Stevens</i>	87
A dose interpolation routine for multiple dilutions in radioimmunoassay <i>D J R Laurence, Susan C Kirkland, and Morag L Ellison</i>	91
Solid-phase enzyme immunoassay of human plasma follicle stimulating hormone <i>A C Lovesey</i>	95
An assessment of a microcolumn chromatographic method for the measurement of haemoglobin A <sub>1</sub> <i>R Baumgart, M W France, D UaConaill, S Murnaghan, M Pereira, and M I Drury</i>	101
A comparison of the phosphotungstate magnesium precipitation and heparin-manganese precipitation procedures for estimating high-density lipoprotein cholesterol <i>G D Calvert, Rosemary A Yeates, and Tiina Mannik</i>	105

## VOLUME 17 PART 3 MAY 1980

Editorial	109
Immunoreactive aldolase C in cerebrospinal fluid of patients with neurological disorders <i>V J C Willson, J G Graham, I N F McQueen, and R J Thompson</i>	110
Human brain aldolase C4 isoenzyme: purification, radioimmunoassay, and distribution in human tissues <i>V J C Willson and R J Thompson</i>	114

Radioimmunoassay in the h-TSH screening procedure	
<i>R W H Edwards, J A Hulse, Doreen Jackson, Anne Spracklan, and Barbara E Clayton</i>	122
Rapid determination of alpha-fetoprotein in amniotic fluid using an automated immunoturbidimetric technique	
<i>Stuart E Evans</i>	130
Serum gamma-glutamyl transferase and a somatic health score in middle-aged men	
<i>E Trell, B Petersson, H Kristenson, G Fex, P Larne, M Yettra, and B Hood</i>	134
A critical evaluation of a serum seromucoid assay and its replacement by a serum $\alpha_1$ acid glycoprotein assay	
<i>Patricia A Thaw and Eileen C Albutt</i>	140
Flameless atomic absorption spectroscopy of plasma chromium	
<i>David A Thompson</i>	144
An assessment of the Corning electrophoretic procedure for high density lipoprotein cholesterol estimation	
<i>D G Bullock, T J N Carter, Carmel M Cosgrove, and Susan V Hughes</i>	148
An improved continuous flow method for serum creatinine using the Jaffé reaction	
<i>W A White and E C Attwood</i>	153
A rapid method for the determination of perhexiline in serum using gas-liquid chromatography	
<i>J D H Cooper and D C Turnell</i>	155
Short Report	
Enzyme immunoassay of thyroxine with Cobas Bio centrifugal analyser	
<i>P Woodrup, G Willing, and D Watson</i>	159

#### VOLUME 17 PART 4 JULY 1980

Technical bulletin No. 41	
The use of biochemical tests in the diagnosis of disorders of calcium metabolism	
<i>Angela Fairney</i>	161
Formulation of optical conditions for an immunonephelometric assay	
<i>J T Whicher and C Blow</i>	170
Quality of commercially available controls in laser immunonephelometry	
<i>G Shulman</i>	178
Automated enzyme assay of antithrombin	
<i>S A Cederholm-Williams</i>	183
Micromodification of an immunoradiometric assay for proinsulin	
<i>A M Sopwith and C N Hales</i>	185
A direct fluorimmunoassay for conjugated chenodeoxycholic acid using antibody coupling to magnetisable particles	
<i>F A Shridi, A Chitranukroh, M Pourfarzaneh, Barbara H Billing, and G Ekeke</i>	188
Reaction rate retardation as a method for serum alkaline phosphatase isoenzyme measurement	
<i>Pamela B Brown and K O Lewis</i>	192
A comparison of three methods of measuring serum high density lipoprotein cholesterol in diabetics and non-diabetics	
<i>P N Durrington</i>	199
Internal analytical quality control using the cusum chart and truncated V-mask procedure	
<i>R W H Edwards</i>	205
24-hour urine composition of Sri Lankan adults and their response to 100 mg dihydrochlorothiazide	
<i>T Vinayagamoorthy</i>	212
Technical note	
An economical reagent for use with the Beckman Analyzer in estimating plasma urea	
<i>T F Dyer and D A Cocks</i>	214
Book reviews	216

#### VOLUME 17 PART 5 SEPTEMBER 1980

A recommended scheme for the evaluation of kits in the clinical chemistry laboratory	
<i>I W Percy-Robb, P M G Broughton, R D Jennings, J J McCormack, D W Neill, R A Saunders, and Mary Warner</i>	217

Plasma cortisone in man: its determination, physiological variation, and significance <i>J D Few and G C Cashmore</i>	227
A comparison of urine free cortisol (RIA) with cortisol metabolites (GLC) for detecting increased cortisol secretion <i>R E Chambers, S R Willets, and G Walters</i>	233
Effects of analytical error on the clinical discrimination of the urinary 11-hydroxycorticosteroid assay <i>M J Levell</i>	237
Radioimmunoassay of thyroxine-binding globulin: evaluation of a kit and diagnostic application <i>J Ahmed and P Smethurst</i>	241
A procedure for the redefinition of equivocal results in thyroid function tests <i>D J Barnard, J P Bingle, and C J Garratt</i>	247
Effect of platelets on apparent leucocyte ascorbic acid content <i>R M D Evans, L Lias Currie, and A Campbell</i>	252
Quantification of antibodies against factor VIII by an immunonephelometric method in a continuous-flow system <i>F Malagon, F L Elorza, E Martin, and A Jimenez</i>	256
Improved continuous-flow analysis for serum bilirubin <i>Porntip H Lolekha</i>	262
Determination of 5-fluorouracil in human plasma by high-pressure ion-exchange chromatography <i>Lorna S F Hsu and T C Marrs</i>	272
Book reviews	277

#### VOLUME 17 PART 6 NOVEMBER 1980

Evaluation of laboratory tests in hospitals <i>J A Stilwell, D Young, and A Cunningham</i>	281
Validity of transcobalamin II-based radioassay for the determination of serum vitamin B <sub>12</sub> concentrations <i>Gulielma Paltridge, Z Rudzki, and R G Ryall</i>	287
Evaluation of the Kodak Ektachem glucose and urea methods <i>Penelope M S Clark, L J Kricka, and T P Whitehead</i>	293
Evaluation of a commercial enzymatic method for the determination of total serum bile acids <i>P Tobicsson and M Källberg</i>	301
Valproic acid estimation by enzyme immunoassay <i>A A Elyas, Valerie D Goldberg, N Ratnaraj, and P T Lascelles</i>	307
Oestrogen determinations in urine from pregnant women: a review of six years' quality assessment in the United Kingdom <i>R E Oakey</i>	311
Comparison of digoxin analysis by EMIT with Immophase and Dac-Cel radioimmunoassay <i>A G Rumley, Angela Trope, D J F Rowe, and I R Hainsworth</i>	315
Capillary gas chromatographic measurement of neutral urinary steroids: evaluation and comparison with alternative methodology <i>G Phillipou, R G Frith, and S K James</i>	319
Calibrant solutions for continuous-flow urate analysis: interference by formaldehyde <i>R Beetham and P G Sanders</i>	323
Units for reporting the results of toxicological measurements <i>D Simpson</i>	328
External quality assessment of serum alpha-fetoprotein assays <i>J S Woodhead, Heather A Kemp, A B J Nix, and R J Rowlands</i>	332
Clinical and laboratory evaluation of four methods of assessing free thyroxine status in thyroid clinic patients <i>J A Fyffe, L Ayoub, H N Cohen, J G Turner, J A Thomson, and J G Ratcliffe</i>	334
Technical note A single reagent radioimmunoassay method for serum thyroxine <i>R Goodburn and D L Williams</i>	339
Index to Volume 17	341
